DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Wyler et al. The patent to Wyler et al teaches structure as claimed including a reinforcement structure (32), foot member (166), gusset (22) attached to the inner wall of a foot member. With respect to applicant's remarks, note the following. A gusset is a plate that joins to members so as to reinforce or hold them in place. In this respect the members 22, which would include both plate members that run perpendicularly and parallel with the reinforcing members 32 are in mechanical communication (connection) with the reinforcement structure and foot member as claimed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3637

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 4-8, 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wyler et al in view of Vandament. The patent to Wyler et al teaches structure substantially as claimed as discussed above including foot member and reinforcement member the only difference being that the reinforcement member is not "bowed" and the foot member is not foam filled. However, the patent to Vandament (16, 18) teaches the use of providing a supporting member with a pre-stressed reinforcement member that is foam filled. It would have been obvious at the time of the invention to modify the structure of Wyler et al to include a pre-stressed member that is surrounded by foam in the support, as taught by Vandament since such reinforcement structure is shown to be old in supporting structures thereby providing structure as claimed.

Allowable Subject Matter

Claims 9, 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 10/22/04 have been fully considered but they are not persuasive.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
